In the end, I thought the joke would wear thin, going on for years with no punch line.
She would use speech balloons when talking to teachers.
Things that went along with that idea I didn't go with, Number 1.
In the end, it was never revealed who Nanige-san truly was.
Number 2: The librarian would be the only one who knew she was staff.
She would see her card when she returned books (lol)
For a brief while, I planned for her to be a member of the "teaching staff".
